Linda Debray

UX Product Design and Web Development
Berlin Area, Germany

Summary

My focus lies in UX-Design, digital product design and web front-end development. In previous projects I worked on concepts and implementation for mobile applications and websites. Additionally I am curious about AR and VR technologies. I enjoy to work in multinational surroundings. Therefore I've obtained a diverse international background by living in different countries around the world. I attended universities in South Korea and Germany and gained valuable working experience in Spain and Germany.
